

Ooops...Miss again! What is going on?

1		<p>A. Breathing during trigger squeeze B. Vertical body sway C. Lack of physical fitness</p>
2		<p>A. Improper body position (rifle forced on target) B. Incorrect rifle holding C. Horizontal body sway</p>
3		<p>A. Incorrect trigger pull (sideways) B. Trigger finger is touching trigger guard C. Incorrect sight alignment (to the left)</p>
4		<p>A. Incorrect sight alignment (to the right) B. Too much thumb pressure on rifle grip</p>
5		<p>A. Aperture too small (optimal 3.1 - 3.3) B. Pulling back on rifle when firing</p>
6		<p>A. Trigger "jerk" (too fast pull) B. Muscles are too tense, position is not relaxed</p>
7		<p>A. Excessive pulling back on rifle when firing B. Right elbow sliding out C. Trigger pull is too slow D. Sling is too tight</p>
8		<p>A. Pulled shot B. Trigger pull is too fast C. Sling is too loose</p>
9		<p>A. Pulled shot B. Rifle canting C. Left elbow too much inside (prone)</p>
10		<p>A. Incorrect wrist alignment when firing B. Too much pressure on thumb pad when firing</p>
